To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). NOTICE OF APPEAL							
2. The Notice of Appeal was filed on A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Continuation of 11. does NOT place the application in condition for allowance because: of the reasons as set forth in the Final Rejection. Anderson et al. disclose providing dielectric coverlayer of thickness of at most 50 microns (at most 5 microns is only preferable) while Fuij et al. disclose forming a coverlayer by resin solution of thickness of 5-100 microns. These coverlayers thicknesses overlap and both reference desire to minimize coverlayer thickness but the references do not teach away from each other. It is not required that the resin of Fuji is heated to harden prior to the joining step, as argued, and further, the Examiner's position is to use the process of Fuji (applying coverlayer from a resin solution) to apply the coverlayer ink in the method of Anderson, not any particular resin disclosed by Fuji.
